

It is critical that in person therapy incorporates safety guidelines. Your therapist will wear a mask during the sessions and use hand sanitizer. Needed surfaces will be disinfected between therapy sessions and when necessary. Please check with your therapist before your session if you have any questions or concerns.

In addition, you are asked to **refrain from talking on your cell phone during therapy.**

Your understanding is appreciated.

Check in Process

- Participation in therapy is limited to one caregiver and no siblings.
- Caregivers are required to stay during the OT session.
- Caregivers and children over 2 are required to wear masks.
- Please wash hands before entering (restrooms are near elevators) and hand sanitizing after entering OT room.
- Your therapist will check your temperature when you enter the OT room and ask you to attest to your health screening----see below (this applies to both caregiver and person who is receiving OT)

COVID Screening Questionnaire

- Are you or anyone in your household awaiting results of a Covid test or in recovery phase of an active Covid infection?
- Have any cough symptoms?
- Have shortness of breath or sore throat?
- Experienced loss of taste or smell?
- Have you had contact in the last 10 days with a person who has tested positive for Covid?
